

ISC WiFi Policy

In order to provide the most robust wireless internet service possible, the ISC organizers have developed the following WiFi Policy. This policy is binding for all participants of ISC events.

The ISC exhibitors and attendees are not allowed to operate any IEEE 802.11 wireless access point or any other equipment transmitting in the 2.4GHz or 5GHz frequency range in the conference and exhibition venue during the event. This also includes build-up times.

The ISC organizers reserve the right to impose a fine of 10.000€ on any exhibitor in violation of this policy.

Attendees violating the ISC WiFi policy may be asked to leave the conference without a refund at the sole discretion of the conference organizers.

It is the organizers' goal to create a successful, pleasant experience for all participants of ISC events. This includes reliable, quality wireless internet access in all areas of the conference and exhibition venue. Please help us achieve this goal by not operating equipment that will interfere with other users.

If you have any questions during the conference, please contact us at iscnet@isc-events.com or at the Exhibitor Services desk at booth #N-100.
