

HPC IN ASIA AT ISC 2022

The [HPC in Asia Session](#) is unique in nature as it provides an insight into the high performance computing research, trends, successes and challenges experienced by researchers and businesses in the participating Asian countries.

James Lin

Topics

The 2022 program is designed to offer status reports from nine countries (Australia, China, Japan, Korea, Qatar, Saudi Arabia, Singapore, Taiwan and Thailand).

HPC in Asia Posters

We have merged the HPC in Asia posters with our regular research poster submission. Researchers in Asia (Asian citizens, and/or working for institutions in Asia) are strongly encouraged to submit their poster proposals toward the [ISC 2022 call for Research Posters](#).
